

Virtual Clinical Reality

Our online platform for virtual clinicals has the following areas to be completed;

- Medical/Surgical
- Pediatric
- Obstetrics
- Psychiatric
- Emergency Room
- Dosage Calculation
- Medication Administration

Students must complete clinical time in each area with a minimum of 90% scoring, in the areas of Medical Surgical, Obstetrics, Pediatrics, Psychiatric must have a minimum of 8 hours logged in each area.

The virtual clinical course logs your time as if you are at a real clinical; by example if you only spend 15 min in medication administration you only will get credit for 15 minutes. This means in order to complete 48 clinical hours you must log into the system often, and complete tasks assigned with a 90% or better.

If you stay on task and do "1.37" clinical hours each night including the weekends you will complete 48 hours within the 5 week time frame.

DO NOT ATTEMPT TO WAIT TILL THE LAST MINUTE TO LOG IN!
